

Reference Conditions

For the Private Sector Investors in the Field of Installing Generation Power Plants based on (BOO or BOOT) Scheme

1. The Electricity Sector shall secure the proper site for the project, define the power plant type and capacity and determine the required Commercial Operation date.
2. The Electricity Sector shall coordinate with the Ministry of Petroleum (MoP) to secure the delivery of Fuel required to test and operate the power plant as part of the Electricity Sector's share of fuel, on the basis that the fuel price is a pass-through item.
3. The Electricity Sector shall secure the Sovereign Guarantee for the project.
4. The Electricity Sector shall issue the RFPQ to conclude the short listed investors who will be invited to participate in the project.
5. The Egyptian Electricity Holding Company (EEHC) shall make the required studies to interconnect the power plant to the National Electrical Network and shall purchase the electrical energy generated from the plant.
6. The Electricity Sector shall prepare the RFP document and the draft agreements that will be signed with the investor.
7. The Investor should obtain the required consent from the Environmental Affairs Agency pursuant to the respective environmental conditions.
8. The Investor should obtain the required License from the Egyptian Electric Utility and Consumer Protection Regulatory Agency allowing him to produce Electricity.
